For suffers of anxiety atenolol comes in tablet form. They may be taken with or without food and should be taken according to the directions on the prescription label. Anxiety Atenolol tablets belong to a class of medicines known as beta blockers. Beta blockers are used to treat palpitations, sweating and tremors. They are also prescribed for people who suffer from social anxiety, anxiety and social phobias. Beta blockers have the ability to reduce blood pressure and help to slow your instantly thumping heart so that it beats more regularly. Read more articles like these at treating anxiety disorder
